IT Technical Support: Dealing with customers in a professional manner while tending to their technological needs efficiently, has been a mainstay in my job description for over a decade. Troubleshooting, reporting bugs, investigating, designing, and performing product tests were a daily requirements at my previous full-time job at Tira Wireless where I also gained deep insight into the development cycle of software. Currently, I provide a comprehensive array of technical services that generally involve managing issues and fixing the problem, and then addressing the root causes to implement preventative strategies for the future. Setting benchmarks, maintaining licenses, and creating guidelines are other areas I have contributed to in both my full and part-time jobs.

I am a recent graduate of the University of Toronto's coding Bootcamp with a new set of skills as a Full Stack Web Developer. HTML, CSS, JavaScript, Node.js, React, SQL, Express.js, and Bootstrap are among some of my acquired skills.

Work Experience

Creative Director

Nebula Media.ca - Woodbridge, ON
August 2013 to September 2021

A host of responsibilities including but not limited to overseeing video production, 3D integration, and video editing.

Modeler and Texture Artist

Marvimation - Ontario
July 2011 to June 2012

3D Modeling position.
Modeling objects for 3d integration through live action.

Internship

Intelligent Creatures
2010 to 2010

2010

Worked on MODELLING, TEXTURING, ROTO-SCOPING for feature pilot projects
Rotoscoping and lens grid distortions were some of the skills that were mainly honed

Quality Assurance - Mobile Game Platform

Tira Wireless - Ontario
August 2007 to July 2008

- Tested and logged bugs, addressing issues through the JIRA workflow manager, conducted field tests, and regressions, developed strategies to reduce redundancies, and completed general QA duties such as running reports and assisting the team in hitting weekly targets.
- Set up a rotating schedule to improve team efficiency by assigning equipment for specific periods to each team member to reduce dead time and exceed weekly testing targets
- Clients included companies such as Sony, ING, Hudson Soft, THQ, and AccuWeather, each with specific demands and multiple unique requests to account for in testing scenarios.

Technical Support-Inbound Call Centre

Epson Printing - Richmond Hill, ON

December 2003 to January 2005

- Provided troubleshooting for the complete product line, resolved complaints, and ordered replacements for customers in a timely manner while up-selling other Epson products
- Conducted weekly reports, solved issues that required multi-department input, and introduced ideas such as empowering the group with more tools to resolve complaints
- Maintained top performance numbers for accuracy and commended for punctuality

Computer Technician

Advanced Brake Products - Ontario

June 2003 to August 2004

- Set up multiple office computers and connected them to the network to share office resources such as inventory systems, billings, production, and multiple sets of printers
- Provided considerable support in training and preparing staff for tasks on the new systems as well as set up security to prevent damage or loss of valuable information
- Performed routine tasks to keep the network and individual workstations problem-free and was responsible for all software and hardware issues experienced by staff

Education

AEC / DEP or Skilled Trade Certificate in Web Development

University Of Toronto Coding Bootcamp - Ontario

May 2021 to November 2021
